

What EPIC Provides

Enterprise Policy Interactive Capability (EPIC) provides Army logisticians with a web based end-to-end policy, and logistics knowledge management tool.

Policy Search

The Policy Search provides staffs with a more timely method of delivery of information to the war fighter and the Institutional Army because policies can be grouped by topic rather than entire documents, users can focus their search requirements only to relevant pieces of policy.

ALARACT Search

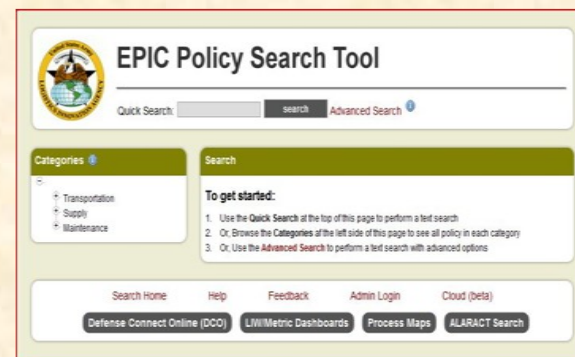

Search all Army ALARACTs within EPIC.

Stakeholders

Contact: Ms. Donna Huggins
EPIC Project Lead
U.S. Army Logistics Innovation Agency

EPIC Mobile Access

What is Enterprise Policy Interactive Capability (EPIC)

- Web-Based Army logistics policy search tool, providing Army logisticians with precise and focused quick access to all G-4 Army regulations, Pamphlets, ALARACTS and the Defense Transportation Regulation (DTR).
- Provides users with relevant portions of a regulation based on a particular problem or issue being worked.
- Integrates logistics policies with logistics business processes and doctrine.

Access EPIC at

<https://epic.lia.army.mil/obfweb/default.aspx>

For more information on EPIC visit
LIA's Website at

<https://lia.army.mil/>

EPIC Mobile Access

- Browser-based that works with iPhone, Android, iPad, Tablets, and Blackberry to EPIC server with AKO Log-in.
- Searches ALARACTs and Policies.
- Provides a cross-functional view of policy, showing inter- and intra-discipline (Maintenance/Supply/Distribution) relationships by keywords to paragraph level.

Access EPIC mobile at

EPIC Efforts

Efforts to Date:

- Imported all G4 policy and
- Defense Transportation Regulation
- Developed an automated import tool for ALARACTS
- Modified GUI to allow users to search ALARACTS only
- Completed IA certification June 2010

Current Efforts:

- Developing multi-view capability
- Developing mobile access for smart phones

Final Effort:

- Transition EPIC as an all-Army tool
